10KV COMBINED TRANSFORMER(AMERICAN BOX TYPE TRANSFORMER)

Product Specification

- Voltage (kV): 10kV
- Rated Capacity (kVA): 1000 KVA
- Connection Type: Z-terminal Type, H-ring Net Type
- Short Circuit Impedance (%): 4.5%
- No-Load Loss (W): 500W
- Dimensions (LxWxH): 1070x1070x1300 Mm
- Highlight: **10kV Three Phase Auto Transformer, Residential Three Phase Auto Transformer, Industrial 3 phase auto transformer**

Product Description

Compact Three Phase Auto Transformer for Industrial and Residential Applications

Product Description:

The 10kV Combined Transformer, also known as the American Box Type Transformer, is a compact and highly efficient electrical solution widely used in various industrial and residential applications. It is designed for reliable power supply, featuring a flexible structure, easy installation, and operation. This transformer integrates the transformer core, high voltage load switch, and protection features such as fuses, all housed in the same tank, ensuring a smaller footprint and efficient performance. Ideal for environments where space is a premium, it offers robust protection and a streamlined, integrated design.

Application:

This transformer is suited for use in industrial parks, residential areas, commercial centers, urban roads, and high-rise buildings. It is particularly beneficial for projects that require quick installation and operation, such as urban network construction and distributed energy systems. Its compact size and versatility make it ideal for use in confined spaces, while its design ensures reliable performance in various operating environments.
